MESSAGE FROM EXECUTIVE DIRECTOR

At **KOSMOS INNOVATION CENTER (KIC)**, we believe entrepreneurship is a powerful driver of economic transformation, innovation and job creation. Our approach goes beyond nurturing business ideas; we equip entrepreneurs with the skills, knowledge, networks and resources to build resilient, competitive and commercially viable businesses.

Through our programs, we identify and empower emerging entrepreneurs, particularly young people, to harness innovation, technology and local opportunities to address real market needs. By supporting businesses across the agricultural value chain and related sectors, we are contributing to a stronger enterprise ecosystem, creating employment opportunities and unlocking economic potential within communities.

This work is made possible through the commitment of our partners including the Mastercard Foundation, Kosmos Energy, AGRA whose collaboration and shared vision continue to expand opportunities for entrepreneurs. We remain grateful for these partnerships and welcome new investors, institutions, businesses and development partners to join us in advancing this mission.

We invite you to explore the businesses featured in this catalogue, discover their potential and be part of the next chapter of African entrepreneurship.

Benjamin Gyan-Kesse
Executive Director
Kosmos Innovation Center

ABOUT **KIC**

KOSMOS INNOVATION CENTER (KIC) Ghana is a non-profit organization that invests in young entrepreneurs and small businesses within the agricultural sector. We empower and provide funding support to entrepreneurs to turn their ideas into viable, self-sustaining businesses and we work alongside promising small businesses to help them scale and reach their full potential. KIC was established in 2016 as a CSR Program of Kosmos Energy. By December of 2020, it was incorporated into a full-time NGO with its independent Board of Directors. At KIC, our goal is to drive innovation, create and apply commercial solutions to Ghana's key development challenges, starting with agriculture.

Kosmos Innovation Center is an independent organization, and its policies, operations, and program decisions are determined by its own Board of Directors and senior leadership team.

Since its inception in 2016, more than 145,255. young leaders have been trained in business skills, mindset change about agriculture and entrepreneurship through participation in our programs.

OUR MISSION

To empower entrepreneurs to build innovative, sustainable, scalable businesses that create jobs for Africa's economic transformation, with a focus on youth and agriculture.

OUR GOAL

At KIC our goal is to drive innovation, create and apply commercial solutions to Ghana's key development challenges, starting with agriculture.

OUR PURPOSE

Powering Innovation, Transforming Communities and Impacting Lives

OUR FOCUS **AREAS**

Kosmos Innovation Center serves as a catalyst for transformative change in Ghana's agricultural sector. We Are:

Accelerators of Youth-Led Agribusinesses: We transform promising ideas into scalable, investment-ready ventures through structured training, mentorship, and funding support.

Champions of Agricultural Innovation: We leverage technology and innovation as drivers of economic transformation, enhancing productivity, improving yields, and creating sustainable employment opportunities.

Builders of Strategic Partnerships: We unlock opportunity through strong, sustainable collaborations with private sector experts, development partners, academic institutions, and government agencies.

Developers of Future Agri-Leaders: We are shaping a new generation of agricultural entrepreneurs who are powering Ghana's economic development and contributing to food security and food sovereignty.

Creators of Lasting Impact: We build businesses that generate jobs, strengthen food systems, and deliver long-term socioeconomic benefits to communities across Ghana and Africa.

Each of our programs is driven by local staff and private sector experts, ensuring a distinctive focus on commercially viable solutions grounded in local knowledge and market realities. Our customized, best-in-class business support model integrates skills training, mentorship, seed funding, and ongoing aftercare to maximize participant success.

OUR **PROGRAMS**

- **Agritech Challenge Classic**
- Young Farmer Business Academy
- **AgriTech Challenge Pro**
- KIC Incubation Program
- **School Farm Competition**
- KIC Fellowship
- **Agricultural Innovation for Africa Conference**
- Young Agripreneur Forum
- **Business Booster**
- Expanding, Mentoring and Coaching to build capacity and expand access to Technical and Financial resources for Disadvantaged youth in agriculture in Ghana Project.

INVESTING IN THE FUTURE, ONE ENTREPRENEUR AT A TIME

10TH ANNIVERSARY

KIC CENTER OF EXCELLENCE -KUMASI

We are a **multi-disciplinary innovation and prototyping hub** designed to support the development of practical, market-ready solutions, particularly within **agriculture, manufacturing, engineering, construction, IT, energy, extractive** and related sectors

CORE FACILITIES

- **Food Innovation Lab**
- Electronics & Mechatronics Lab
- **Computer-Aided Design (CAD) Lab**
- Metal Fabrication Workshop
- **Woodwork & Fabrication Unit**
- Workforce Development

KEY SERVICES

- **Product design and prototyping**
- Fabrication and technical services
- **Food product development and testing**
- Technical training and skills development
- **Startup incubation and enterprise support**

BENEFICIARIES

- **Startups and entrepreneurs**
- SMEs and Manufacturers
- **Agribusinesses**
- Universities, High Schools and Research Institutions

PARTNERSHIP

- **Co-development of products and solutions**
- Industry-led innovation pilots
- **Technical service provision**
- Training and workforce development
- **Research and commercialization support**

TRUSTED BY

PARTNERING INSTITUTIONS

3Farmate Robotics

3Farmate Robotics innovates agricultural efficiency through AI-driven automation to transform labor-intensive crop production into a streamlined, sustainable process.

Incubation Cohort Year: 2024

Location: Accra

Team Lead: Clinton Anani

Agrimercarb

Agrimercarb produces consistent quality protein meal derived from black soldier fly larvae, fed on locally sourced organic waste. This is to curb the rising cost of fish feed resulting from the high cost of protein meal.

Incubation Cohort Year: 2022

Location: Accra

Team Lead: Luther J. Quarshie

Agro Empire

Agro Empire provides a complete automated environment that would enable all-year-round snail production and the use of hygienic processing to provide ready-to-eat snail products and other by-products from snail productions.

Incubation Cohort Year : 2023

Location : Accra

Team Lead: Dennis A. Ababio

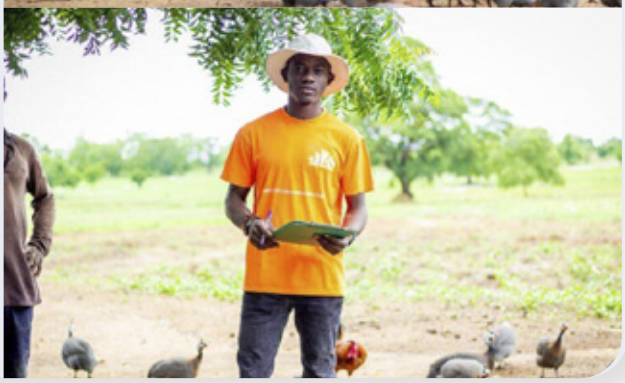
Agro KiniSols

GuineaGenesis specializes in hatching and nurturing high-quality guinea keets, revolutionizing the guinea fowl farming landscape in Ghana. We address challenges such as rural poverty and limited access to quality keets, empowering farmers with transformative solutions.

Incubation Cohort Year: 2024

Location: Bolgatanga

Team Lead: Frank A. Abendin



AgroCold Ghana

AgroCold Ghana is providing an Internet of Things (ripening detector), solar-powered cold storage facility to increase shelf-life, marketability and reduce post-harvest losses in the fruits and vegetables value chain in Ghana.

Incubation Cohort Year: 2023

Location: Cape Coast

Team Lead: Dr. Shaibu Zikiru

AgroInnova

Agro Innova Ltd. an Agri-Tech company focused on improving agriculture in Africa by developing farmer-centered technology to address the challenges faced by smallholder farmers and the value chain players.

Incubation Cohort Year: 2017

Location: Accra

Team Lead: Moses Mallaghan

Agroseal

Agroseal Ltd. is a commodity trading company that empowers fruits and vegetable small holder farmers through innovation and technology to gain reliable and constant access to higher end market markets to increase income levels and reduce poverty.

Incubation Cohort Year: 2017

Location: Accra

aiScarecrow

AiScarecrow produced an intelligent fully automated scarecrow that allows cereal farmers to effectively deal with pest birds from their farmlands

Incubation Cohort Year: 2019

Location: Accra

Team Lead: Silas K. M. Boateng

AkoFresh

The innovation for AkoFresh is a mobile solar powered cold storage preservation technology that extends shelf life of perishable crops from the usual 5-day period to 21 days to reduce post-harvest losses and ensure improved livelihood of smallholder farmers.

Incubation Cohort Year: 2023

Location: Accra

Team Lead: Mathias Charles Yabe

AquaMet

A technological system that enables fish farmers to efficiently monitor and manage their water quality to reduce high fish mortalities and increase yield.

Incubation Cohort Year: 2023

Location: Accra

Team Lead: Frank Owusu

Aretha Forson Enterprise (Aretha Organics)

Aretha is a plant based haircare brand that caters to people with textured hair. It uses nuts and seed oils and natural herbs to counteract hair health issues and preserve the overall health of women.

Incubation Cohort Year: 2024

Location: Takoradi

Team Lead: Aretha Forson Donkor

ASA NWURA

ASA Nwura provides alternative earnings to farmers with waste that they generate. Farmers can find value from trading their agro-waste through Asa Nwura's recycling and off-taking platform.

Incubation Cohort Year: 2022

Location: Takoradi

Team Lead: Benjamin A. Turkson

KOSMOS INNOVATION CENTER | 10TH ANNIVERSARY

AgriEase

AgriEase is an agro-startup that is into the construction of automated cashew nut separation machines for cashew farmers.

Incubation Cohort Year: 2025

Location: Accra

Team Lead: Emmanuel Yeboah

Awunpara

AgricTech platform to connect people living in towns and cities to trusted and vetted sources of labor for Agricultural activities, and the "number 1" market place for everything Agric in Ghana.

Incubation Cohort Year: 2023

Location: Kumasi

Team Lead: Amoro Abdulai

BOOD

BOOD provides an alternative and easily accessible way for farmers to get farm inputs at fair prices; improved ways that will give them and their households maximum returns on their farms and a resulting raise in their living standards.

Incubation Cohort Year: 2024

Location: Wa

Team Lead: Tracy Bawa

BioSpace Gh

BioSpace Ghana Ltd. provides an innovative solution by processing plantain stems and sawdust into affordable, durable crates, reducing dependency on imports and environmental degradation.

Incubation Cohort Yea : 2025

Location: Sunyani

Team Lead: Dominic S. Ugai

BIAQ Golden Cycle

At Golden Cycle, we specialize in extracting and refining the purest oil from mango seeds, harnessing nature's rich nourishment for your skin, hair, and wellness.

Incubation Cohort Year: 2025

Location: Sunyani

Team Lead: Augustine Boakye

BunnyBites

BunnyBites is into the processing of rabbit meat. We source rabbits from small holder farmers to and add up from in house rabbit farm, we process and package them into various kinds, providing reliable supply of rabbit meats on to the market.

Incubation Cohort Year: 2024

Location: Kumasi

Team Lead: Clement Frimpong

Cas-Tech

We are into the manufacturing of paper and wood adhesive from cassava waste(peels and starch) sourced from various processors, breweries and also cassava farmers

Incubation Cohort Year: 2024

Location: Beposo

Team Lead: Arahamani Tawiah

Cogam Stainless Charcoal

Cogam produces and sell stainless and smokeless charcoal from coconut shells and palm kernel shell. Our product comes with an ignition and quenching substance.

Incubation Cohort Year: 2025

Location: Kumasi

Team Lead: Clement Frimpong

Complete Farmer

Complete Farmer is a Ghanaian company that through its proprietary technology connects smallholder farmers with global buyers in the food sector and enables them to track and optimise production and provide a competitive advantage throughout the supply chain.

Incubation Cohort Year: 2017

Location: Accra

Team Lead: Desmond Koney

Danny Machinery

Danny Machinery designs and builds affordable machines for small-scale groundnut oil and shea butter producers. Our goal is to make oil extraction easier, faster, and cleaner while helping producers get more out of their work.

Incubation Cohort Year: 2025

Location : Kumasi

Team Lead : Clement Frimpong

DEECOM Nutrifoods

DEECOM NutriFoods provides direct market for soybeans farmers and adds value to soybeans by processing into an alternative protein to meat for vegetarians/vegans and people who want to reduce their meat intake either by choice or necessity.

Incubation Cohort Year: 2024

Location: Ho

Team Lead : Ntim A. Desmond

Del Soy

Del Soy produces 100% natural soymilk drink that is preservatives -free and consumed by people who want to ensure healthy-living due to its health benefits.

Incubation Cohort Year: 2022

Location: Cape Coast

Team Lead: Bridget Ama Eshun

DeliMush

Delimush spearheads a culinary and ecological revolution, positioned at the forefront of the global paradigm shift towards healthier, sustainable living. Our focus lies in the processing of premium canned mushroom products, sachets and biscuits.

Incubation Cohort Year: 2024

Location : Tamale

Team Lead: Aisha Abdallah

Demy-Pearl

Demipearl supplies healthy and safe groundnut paste to households through improved farming and processing practices for quality production.

Incubation Cohort Year : 2022

Location : Tamale

Team Lead: J.B. Shaibu-Waale

DorthNoch

With the case of post-harvest loss and unavailability of market to purchase produce being detrimental to survival of cassava farmers in these communities, and as a cassava production and processing firm, we aim to bridge this gap of market by being a one stop shop for farmers to gain value for their produce.

Incubation Cohort Year : 2023

Location : Koforidua

Team Lead: E. N. Gyimah

Earth-Allies

Earth-Allies is a startup based in the Bono East Region of Ghana specializing in the production of biodegradable plastic films for agricultural applications.

Incubation Cohort Year: 2025

Location: Sekyikrom

Team Lead: Evans Asamaoh

KOSMOS INNOVATION CENTER | 10TH ANNIVERSARY

EcoLeap

EcoLeap is an agri-business that aims at cultivating anurans (frogs) through out-growers and processing these anuran meats for the Ghanaian market.

Incubation Cohort Year : 2025

Location: Navrongo

Team Lead : Frederick Abendiba

EcoBroma Ghana

EcoBrôma is a Ghanaian company dedicated to creating innovative beverages from cocoa, showcasing its versatility beyond chocolate.

Incubation Cohort Year: 2025

Location: Ghana

Team Lead: Kwame Ofori Kyei

Entofarms Ltd.

Entofarms is an agritech, agro-processing business venture that specialises in converting agricultural by-products into a low cost feeding solution for the aquaculture and livestock sector in Ghana using extrusion technology.

Incubation Cohort Year: 2024

Location: Tamale

Team Lead: Victor K. A. Boafo

Farm Asyst

Farm Asyst provides a mobile and web platform that enables efficient monitoring of farmers and extension officers and allows for disease detection through Machine Learning.

Incubation Cohort Year: 2022

Location: Tamale

Team Lead : Wisdom Zotor

FEEP Fibertech

Feep Fibertech is an agribusiness that is into the production of affordable delivery mats.

Incubation Cohort Year : 2024

Location: Sunyani

Team Lead: Tahiru F. Falilatu

Farm Estates

Farm Estates is an automated, closed space and controlled urban farming solution that helps urban dwellers grow tomatoes organically in three-dimensional vertical racks.

Incubation Cohort Year: 2025

Location: Accra

Team Lead: Ernest Larmie

Fibrelux

Leafluxe textiles is a startup into the production of fabric from the pseudo stems of plantain and banana, underutilized agriculture waste.

Incubation Cohort Year: 2025

Location: Kumasi

Team Lead: Mohammed A. Waris

Freshline Post Harvest Solutions

We are an Agri-food start up championing zero production waste, mitigating excessive farm-level losses and promoting traditional food systems .

Incubation Cohort Year : 2024

Location: Akomadan

Team Lead: Boadu T. Wisdom

GanaFert

GanaFert converts crop waste and animal droppings into a cost-effective eco friendly organic fertilizer for crop production

Incubation Cohort Year: 2024

Location: Agogo

Team Laed: Nana Kusi Appiah

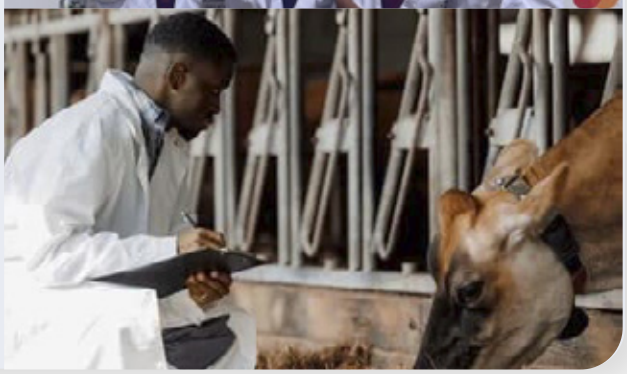
GardPath Technologies

Gardpath is a startup specializing in the production of rapid diagnostic test kits for small and large ruminants. Our innovative solutions empower veterinarians and farmers to detect diseases early, enabling accurate and timely treatment to improve livestock health and productivity.

Incubation Cohort Year: 2025

Location: Tamale

Team Lead: Hussein A. Adams



GreenHeart SE

At GreenHeart SE, we transform agricultural waste in carbon negative agricultural inputs.

Incubation Cohort Year: 2024

Location : Koforidua

Team Lead : Caleb Lomo

Greenhusk Innovations

The demand for paper increases by the day and so as the felling of trees for its production. At Greenhusk Innovations, we produce paper using corn husks thereby channeling a by-product of agriculture into solving a major global concern.

Incubation Cohort Year: 2024

Location: Tamale

Team Lead: Frimpong Kwame

Grow For Me

Grow For Me provides a web and mobile-based Agricultural crowdfunding and crowd farming platform, that sponsors farmers in growing more crops to solve hunger problems in Africa.

Incubation Cohort Year: 2022

Location: Accra

Team Lead : Nana O. P. Agyeman

Growth Line Farm-Tech

We produce and supply affordable, high-quality egg incubators to small-scale farmers in Northern Ghana using locally available materials like old car tyres, fridges and plywoods .

Incubation Cohort Year: 2025

Location: Navrongo

Team Lead: Abraham Atosona

Harvest Ease Innovators

Harvest Ease Innovators is a company which is into agricultural mechanization in Ghana. Starting with maize, we build small harvesters which harvest and dehusk maize from it stalk. This is efficient and cost effective compared to traditional way of harvesting maize.

Incubation Cohort Year: 2024

Location: Sunyani

Team Lead: Abdul Razak Soale

HealthyFarmer

We are working on a Tele-medicine platform that will increase access to quality, prompt and affordable healthcare services for rural farmers

Incubation Cohort Year: 2024

Location: Tamale

Team Lead: Affram Joseph

Hullsnovation

Hullsnovation is agribusiness startup that is into the production of plywood from rice husk and rice straws in combination with plastic waste. Our products are water resistant, pest resistant, non delaminating and affordable.

Incubation Cohort Year: 2024

Location: Tamale

Team Lead: Abdul-Rahim Ziblim

JaasGrow

Jass Grow will helps farmers achieve higher yield by producing a locally made cost-effective organic product that will (dually) serve as both fertilizer and pesticide through the use of organic waste.

Incubation Cohort Year: 2023

Location: Cape Coast

Team Lead: Justice K. Turzin

KIGO Agro

KIGO Agro provides groundnut uprooting machines to reduce farmers' hardship in uprooting groundnut and labor-intensive method at affordable cost in groundnut production.

Incubation Cohort Year: 2023
Location: Wa
Team Lead: Iddrisu B. Fuseini

King Tractor

KIng Tractor develops a low-cost, multipurpose, mini tractor adapted from the traditional tricycle.

The final solution is a four-wheel multipurpose tractor with a 30-horsepower engine capacity (Chafang engine).

Incubation Cohort Year: 2023
Location: Wa
Team Lead: Paul Ziem Viiru

KoduTech

Kodu Technology combats period poverty and environmental waste by upcycling banana and plantain fibers into affordable, biodegradable sanitary pads, offering a sustainable alternative to conventional products.

Incubation Cohort Year : 2023
Location : Tamale
Team Lead : Faried Iddi M.

LbH LC

Our company connects smallholder farmers with agricultural service providers (ASPs) through technology, helping farmers access essential inputs and services while reducing customer acquisition costs for ASPs.

Incubation Cohort Year: 2024
Location: Accra
Team Lead: Ato K. Mensah

KOSMOS INNOVATION CENTER | 10TH ANNIVERSARY

Maku Foods

Maku Foods processes fresh vegetables and spices into ready to use seasoning sauces and marinades thus, a blend of onions, ginger, garlic, pepper, spices and herbs in their fresh states just like done at home.

Incubation Cohort Year: 2022

Location: Adenta

Team Lead: Caroline K. Amanor

McHan Cosmetics

McHan Organics, founded in 2023 , is a trailblazing enterprise dedicated to sustainable cosmetics. We specialize in transforming cocoa pod waste into premium cosmetic ingredients and eco-friendly mosquito repellent.

Incubation Cohort Year: 2024

Location: Sefwi Bekwai

Team Lead: Hannah Appiah

MelDak Agro

MelDak Agro converts cocoa pod husk into theobromine free flour as a substitute to maize for animal feed.

Incubation Cohort Year: 2025

Location: Koforidua

Team Lead: Michael Ofori

Merdeo Foods

Merdeo works as a business-to-business online marketplace that connects local farmers directly with urban vendors through e-commerce and cold solar storage houses to make food more affordable and accessible.

Incubation Cohort Year: 2024

Location: Adenta

Team Lead : Nana K. A. Sarpong

MilkyWorld

MilkyWay is a pioneering startup revolutionizing the dairy industry in Ghana by harnessing the power of locally sourced plants to produce a range of nutritious and sustainable milk alternatives.

Incubation Cohort Year: 2025

Location: Tamale

Team Lead: Ragadawu Alhassan

Millbles

Millbles is into processing of millet into ready to eat and ready to cook. Our business empower women by training and supplying of input to these women to farm millet on the abandoned land closer to their communities and we buy the millet from them.

Incubation Cohort Year: 2025

Location: Tamale

Team Lead: Mary A. Ayorigo

Mushplus Agri-Foods

We produce two wonderful products. That is Mushplus Instant noodles(a mushroom fortified instant noodles) and mushplus protein care (a ready to eat mushroom soya mix) for protein balance.

Incubation Cohort Year: 2025

Location: Kumasi

Team Lead: Emmanuella Aryee

Ni-ima Ltd.

Operating under the brand name Ni-ima Skincare, we are an agro processing company that manufactures plant-based natural skincare products from locally sourced African oils, butters, and herbs, for the local and international market.

Incubation Cohort Year: 2024

Location: Tamale

Team Lead: Salwa Issah

OASAL Group

OASAL Group is pioneering the production of locally available ethanol from agro-waste (cashew apples) for industries.

Incubation Cohort Year: 2021

Location: Accra

Team Lead: Billton Lartey Nyarko

PaCo Paper

PaCo Paper Ltd. is a manufacturing firm that is into production of paper packaging from coconut husk and palm bunches. responsible practices.

Incubation Cohort Year: 2024

Location: Koforidua

Team Lead: Edwins Baah

Peanut Pride

A processing company focused on providing modern snack sensations.

Incubation Cohort Year: 2025

Location: Cape Coast

Team Lead: Angelina Amoah

Peli Natural Glow

While many consider cocoa pod husk to be waste, entrepreneurs and startups can reuse this available material to produce a unique product that is eco-friendly and provide additional income to cocoa farmers and startups.

Incubation Cohort Year: 2025

Location: Takoradi

Team Lead: Eunice Sam Acquah

Premium Biofert

Agro stars turns organic and agricultural waste into bio fertilizers for the use of smallholder farmers

Incubation Cohort Year: 2025

Location: Ho

Team Lead: Osman Kadiri

Prosect Feed

Operates a circular economy model where we use insect tech to bio-convert organic waste in quality, affordable feed for livestock farmers.

Incubation Cohort Year: 2019

Location: Accra

Team Lead: Kwabena Tufuor

PureLube

PureLube is an Agribusiness startup that harnesses the potential of cashew nut shells to produce high quality grease.

Incubation Cohort Year : 2025

Location : Tamale

Team Lead : Abdul Karim Rafiu

Qualitrace

QualiTrace is a traceability and anti-counterfeiting company that uses track and trace technology to authenticate farm inputs and outputs products.

Incubation Cohort Year: 2017

Location: Accra

Team Lead: Kenneth A. Nelson

Rabbitton

We are a value chain management organization whose focus is on rabbit farmers, to ensure we make rabbit meat an alternative source of meat to help the economy and also boost employment.

Incubation Cohort Year: 2024

Location: Cape Coast

Team Lead: Gideon Nana Asmah

Rijona Biochemicals & Body Care

Rijona Biochemicals and Body-care Co. Ltd. is dedicated to crafting skincare solutions that blend science and nature.

Incubation Cohort Year: 2024

Location: Tamale

Team Lead: Azungah H. Rayart

SagriSalma

The company produces an affordable and an enhanced biosolid fertilizer by harnessing all available organic materials and take them through biodigestion processes using cultured microbes and maggots to break complex nutrient down quickly for easy uptake by plant.

Incubation Cohort Year: 2023

Location: Tamale

Team Lead: Kenneth Marshall

Soyko Agro Foods

Soyko Agro Foods is a startup transforming local agriculture into a force for good.

Incubation Cohort Year: 2025

Location: Cape Coast

Team Lead: Jerone O. Agyapong

Sunify Solardry Technology

Sunify Solardry Technology is a company that is developing an affordable and portable mobile solar dryer to address post-harvest losses among rural grain farmers.

Incubation Cohort Year: 2024

Location: Tamale

Team Lead: Zakaria Salifu

Sunray

At SunRay, we provide cutting-edge mechanization solutions, including fertilizer applicators, seeders, and harvesters. We aim to empower farmers with precision technology, optimizing crop yields while minimizing environmental impact.

Incubation Cohort Year: 2024

Location: Dzorwulu

Team Lead: Baba B. Dinwiisi

TechShelta

TechShelta aims to be the go-to hub for greenhouse support services in Ghana. They use technology and automation to maximize the efficiency of greenhouse farming and, through a web and mobile application, they offer advisory and create market linkages for vegetable farmers.

Incubation Cohort Year: 2018

Location: Accra

Team Lead : Bob H. Amponsah

Tekcycle
